C.A.T.

CHIEF GARRY PARK NEIGHBORHOOD

SUMMARY:

Spokane Mayor Lisa Brown announced on August 7 that she entered a formal agreement with Compassionate Addiction Treatment (C.A.T) to move its sobering center and behavioral health services to the middle of our neighborhood (1819 E. Springfield Avenue) - mere blocks from Stevens Elementary School.

Results in our neighborhood during Jewels Helping Hands' occupation in 2021

THE FACTS:

- Our neighborhood is already home to SIX non-profit service providers—including the TRAC facility—and putting C.A.T here will put an inequitable burden on our neighborhood.
- Relocating C.A.T to our neighborhood will bring with it the same crime, vandalism, camping, trash, and safety concerns that are present at its current location (Division St. and Second Ave.)
- We all remember the complete havoc caused during 18 months of Jewels Helping Hands operating out of the same proposed C.A.T building. We know firsthand the impacts of a chronic nuisance neighbor on our residents, schools, parks, and businesses.
- To date, Mayor Brown has sought no input nor dialogue with anyone who lives or works in the neighborhood. Nor has she alerted anyone in the neighborhood that this property was even under consideration.

What Neighbors Are Saying...

“

I'm already worried to have my kids in the backyard with a privacy fence to start. We already have enough illegal activities and problems to add another service building that will cause more.

~ Tesslin C. from Spokane

”

“

Not in our neighborhood. Our week is already filled with crime check called and 311 calls. We don't need to add to our neighborhood burden. Take this service center to a less burdened neighborhood. Our Spokane community has lots of other places not considered yet. Our family's and especially kids in the Chief Garry neighborhood deserve better! So let's do better!

~ Rebekah T. from Spokane

”

“

I don't like my wife working in that area it's not real safe we live in the Logan neighborhood that has gotten bad but nothing like over there.

~ William B. from Spokane

”

“

I work in the in the area and live in the area. I would not like it in this area. I would not like it to be the way it is down town, There would be way more crime then it is now, please find another location.

~ Lenna M. from Spokane

”

“

I have children in this neighborhood for the last 5 years, all the children and parents around we look out for each other by blocks , but the population outside on drugs roaming the streets causing destruction and families to be on edge hours through the night is out of control. We already deal with neighbors like this & our own family struggles. The last thing we need is for more addicts around.

~ Marissa N. from Spokane

”

“

I am a homeowner on the corner of Napa and Malin I will not accept the city allowing my property value to continually fall we have worked hard in the chief Gary neighborhood to clean up the nuisance not for you to bring it back into our neighborhood

~ David M. from Spokane

”

“

My street is full of drug addicts continuously camping and being unsafe doing drugs out in the open and screaming and yelling at our children for playing in their own yard. We don't need another reason for addicts to come in our neighborhood, we are already NOT SAFE. We already have 6 other non profits meeting this need this is not fair!!!! We are already to close to Trent Homeless Shelter.

~ Lucas T. from Spokane

”

“

As a long time resident and home owner in Chief Garry park I reject the proposal to put another service center in our neighborhood. We already have 6+ service providers of underserved populations in our neighborhood this is an unfair burden to one of the already disadvantaged neighborhood of poor and working class people

~ Cori M. from Spokane

”

“

The last time I picked up foils from around my property was last week. Our mayor says that she listened to the community in developing a plan that spread the services around the city, but continues to push them ONLY into the poorest and most diverse neighborhoods where she and her fellow republican/democrat friends don't have to see them. Texas was kinder to their diverse populations than here.

~ Ryan B. from Spokane
